

Enrolling your wallet with **tastytoastys™** into TokenProof

Before you begin you will need:

- A laptop or computer device
- A smartphone device, please go ahead and download the tokenproof app from the Google/Apple App Store

Step 1:

Go to <https://tokenproof.xyz/> and click the launch app button to be redirected to the enrollment flow. There you will connect your wallet that holds Tasty Toasty NFTs.

A screenshot of the TokenProof enrollment flow on a smartphone. The main screen has a dark background with the TokenProof logo at the top left. The text reads: "Unlocking possibilities with peace of mind", "Use tokenproof to safely prove ownership of your tokens. No gas or payment of any type is required.", and "Please connect your Ethereum wallet to begin enrollment". Below this is a white box titled "Connect with one of our available wallet providers below" containing two options: "MetaMask" (with a cat icon) and "WalletConnect" (with a blue wave icon). A red box highlights the MetaMask option. To the right, a MetaMask notification window is open, showing the URL "https://tokenproof.bubbleapps.io" and the wallet address "(0x6f8...a75e)". It asks to "Connect to Main Walle..." and has a "Connect" button highlighted with a red box.

Enrolling your wallet with **tastytoastys™** into TokenProof

Step 2:

After connecting your wallet, you will then be prompted to sign a one-time message.

- Signing a message is required to prove that you're in control of the wallet you are enrolling. Signing is a safe, gas-less transaction that does not in any way give tokenproof permission to perform any transactions on your behalf.
- NOTE: If you are using Wallet Connect, the signature request will appear on the app used to connect. Be sure to confirm the signing before going any further.

A screenshot of the TokenProof interface. The background is dark with a large, faint 't' logo. The text on the screen reads: 'token proof' logo, 'Unlocking possibilities with peace of mind', and 'We will ask you to sign a message to prove that you're in control of the wallet you connected. Signing is a safe, gas-less transaction that does not give tokenproof permission in any way to perform transactions on your behalf.' A circular progress indicator is visible. Overlaid on the right is a 'MetaMask Notification' window. The notification shows the TokenProof logo, the name 'tokenproof', and the URL 'https://tokenproof.xyz'. Below this is a 'Message' section with the text: 'note: Signing a message is required to prove that you're in control of the wallet you are enrolling. Signing is a safe, gas-less transaction that does not in any way give tokenproof permission to perform any transactions on your behalf.' It also includes the 'issued_at' and 'account' information. At the bottom of the notification are 'CANCEL' and 'SIGN' buttons, with the 'SIGN' button highlighted by a red box.

Step 3:

After signing, a registration QR code will show up on your desktop screen, which you will soon scan with your tokenproof mobile application.

The screenshot shows a dark-themed desktop interface. In the top left corner is the 'token proof' logo. In the top right corner, a white rounded rectangle contains the hexadecimal address '0x12412...9485'. The main heading reads 'Unlocking possibilities with peace of mind'. Below this, a paragraph states: 'Scan the QR Code with the tokenproof mobile app to complete enrollment and generate your tokenproof.' A large QR code is centered on the screen, enclosed in a white square with an orange border. At the bottom, there is a line of text: 'Download the tokenproof wallet for iOS or Android and scan this registration QR Code.' Below this text are two buttons: 'GET IT ON Google Play' and 'Download on the App Store'.

Step 4:

To scan the registration QR code, click the add tokenproof button on the mobile application and scan the registration QR code.

You have now successfully completed the tokenproof enrollment process! 🍞

Note: There is no limit to how many ethereum accounts can be enrolled with tokenproof.

For verification of discounts in-stores, show your dynamic QR code to the participating partner. We kindly ask for patience with our partner merchants, as this technology is new to everyone. We appreciate you for being an early adopter of NFT rewards technology! ★
